

Station::getNaam

```
graph LR; A[Station::getNaam] --> B[Station::properlyInitialised]
```

A diagram showing a dependency between two code elements. On the left, a gray rectangular box contains the text 'Station::getNaam'. A blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'Station::properlyInitialised'. Both boxes have a black border.

Station::properlyInitialised
